Ex.No.-1.2-Design and Draft the given 2D Sketches in modelling software.

AIM:

To sketch the given drawing with dimensions using fusion 360 tool.

REQUIREMENTS:
1.Autodesk fusion 360
2.Windows 10
3.16 GB of RAM (integrated graphics recommend 1 GB or more)
4.2.5 Mbps or faster download; 500 Kbps or faster upload

PROCEDURE:
1.First we should open the fusion 360,then select new to create a new project.
2.We should select the view as front or top or which view we want.
3.Then click create sketch to start our project.

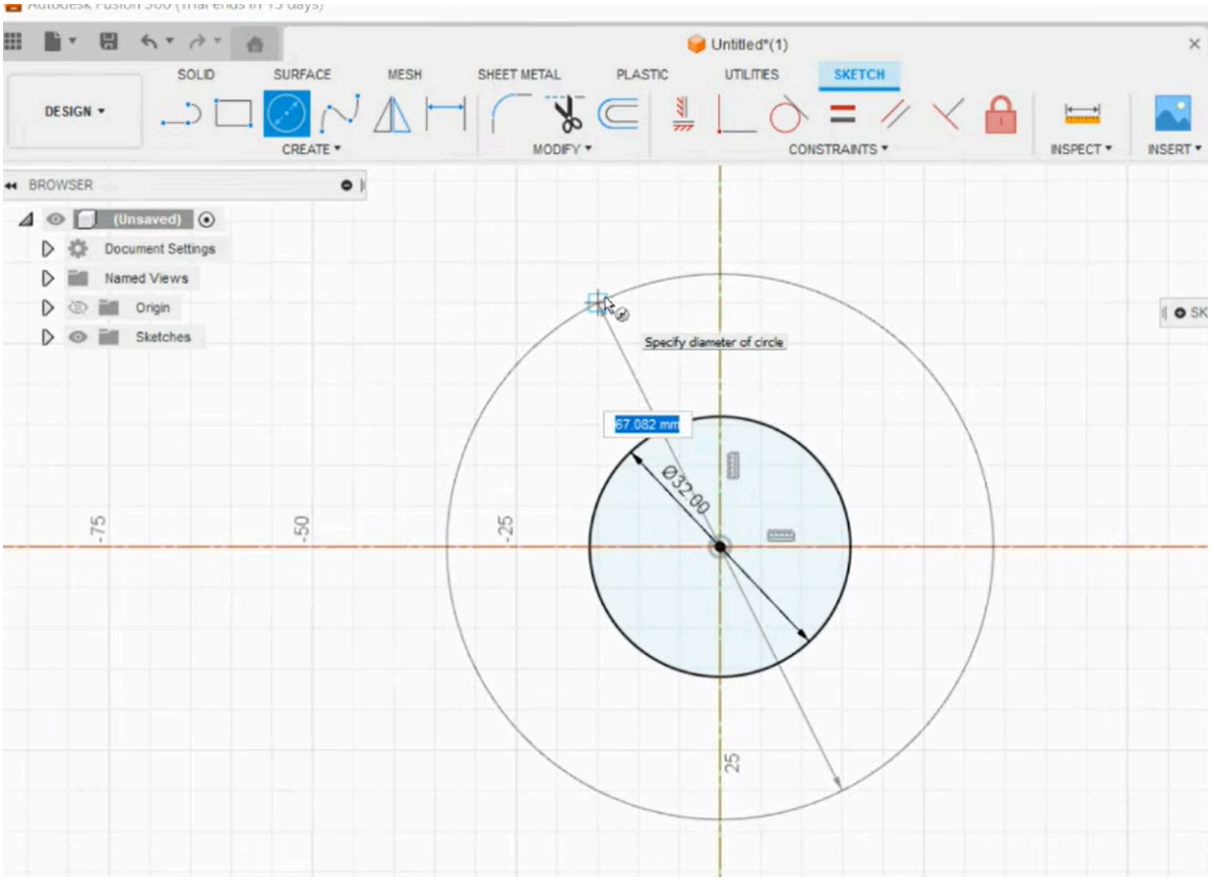

4. Draw the centre circle with a diameter of 40 mm and an outer reference circle with a diameter of 66 mm.

5. Draw a vertical reference line upward for 65 mm. At the top position, draw circles with diameters 20 mm and 32 mm.

6. Draw the bottom reference line downward and create circles with diameters 10 mm and 20 mm.

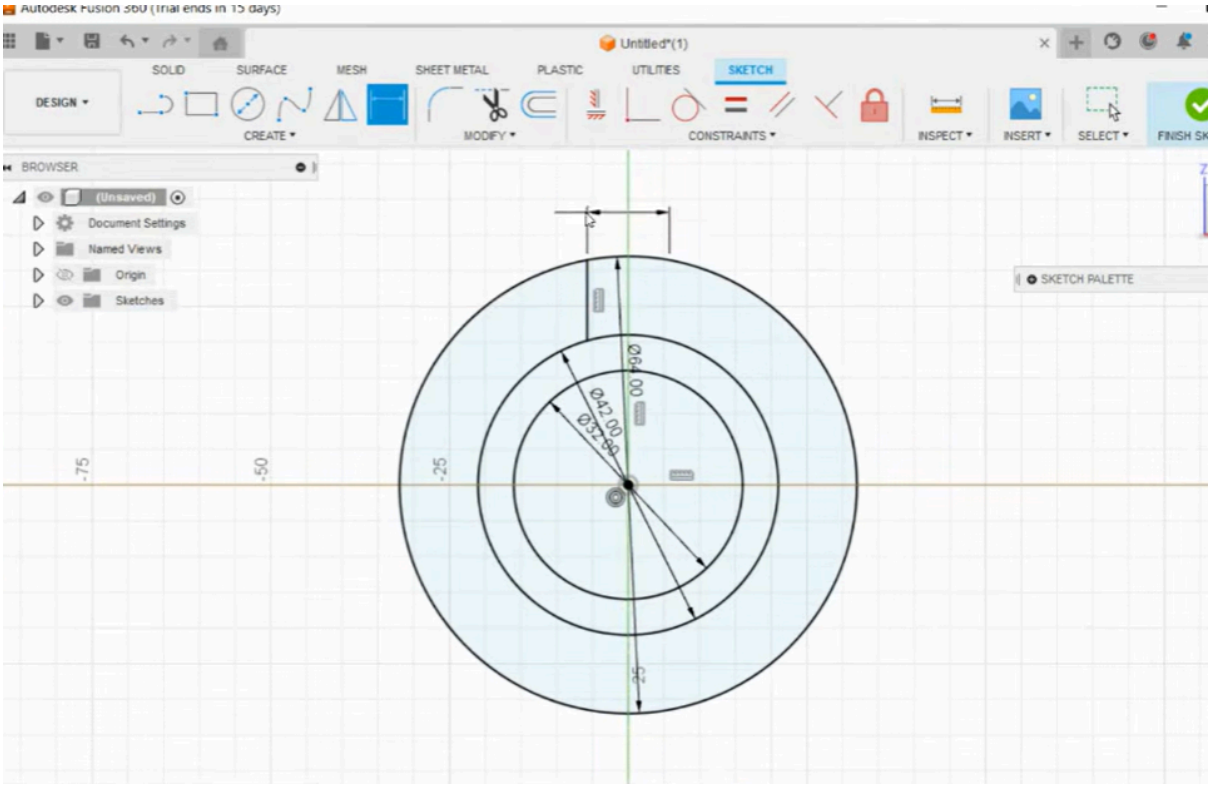

7. Connect the top circular portion with the centre outer circle using the required arc. Join the bottom circular portion using a radius of 20 mm.

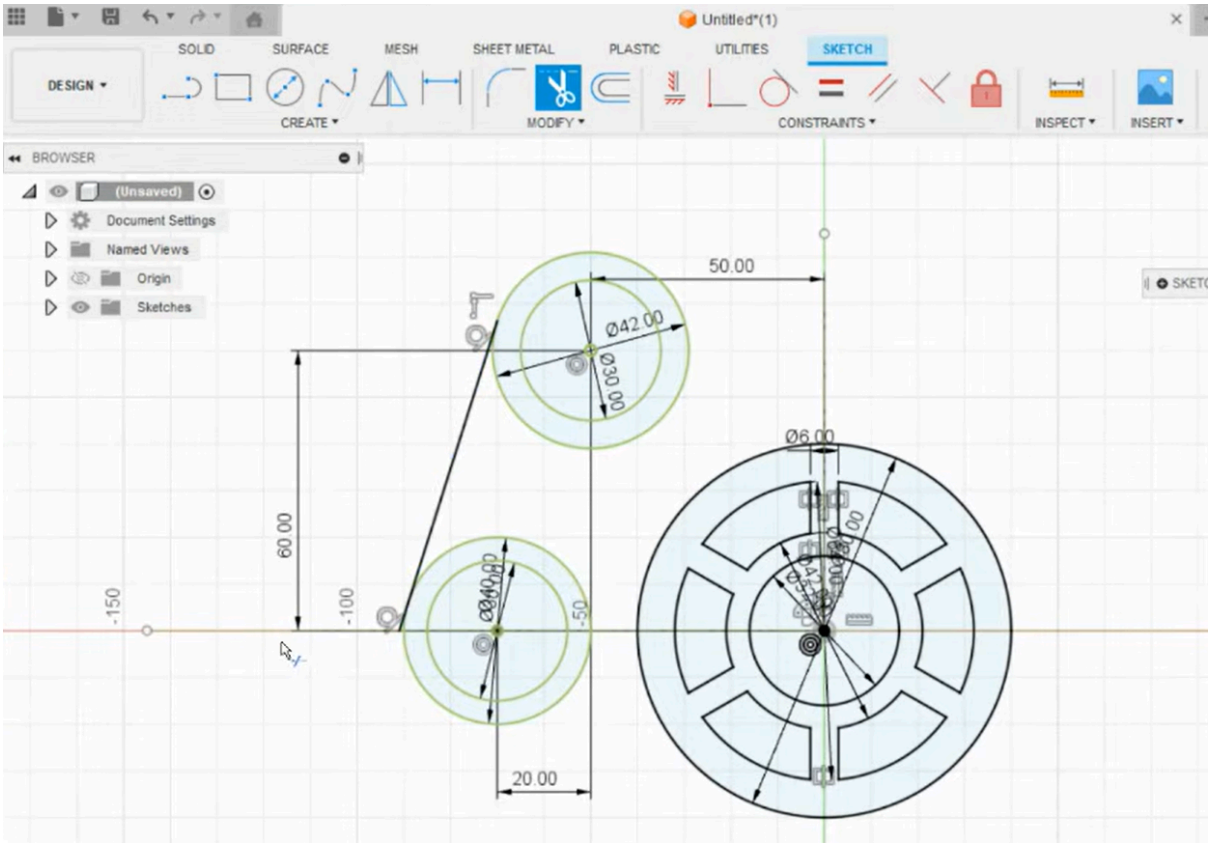

8.Connect the top circular portion with the centre outer circle using the required arc. Join the bottom circular portion using a radius of 20 mm.

9. Draw the side reference line at a distance of 47 mm and provide a downward distance of 26 mm. Create circles with radii 7 mm and 10 mm at the required positions.

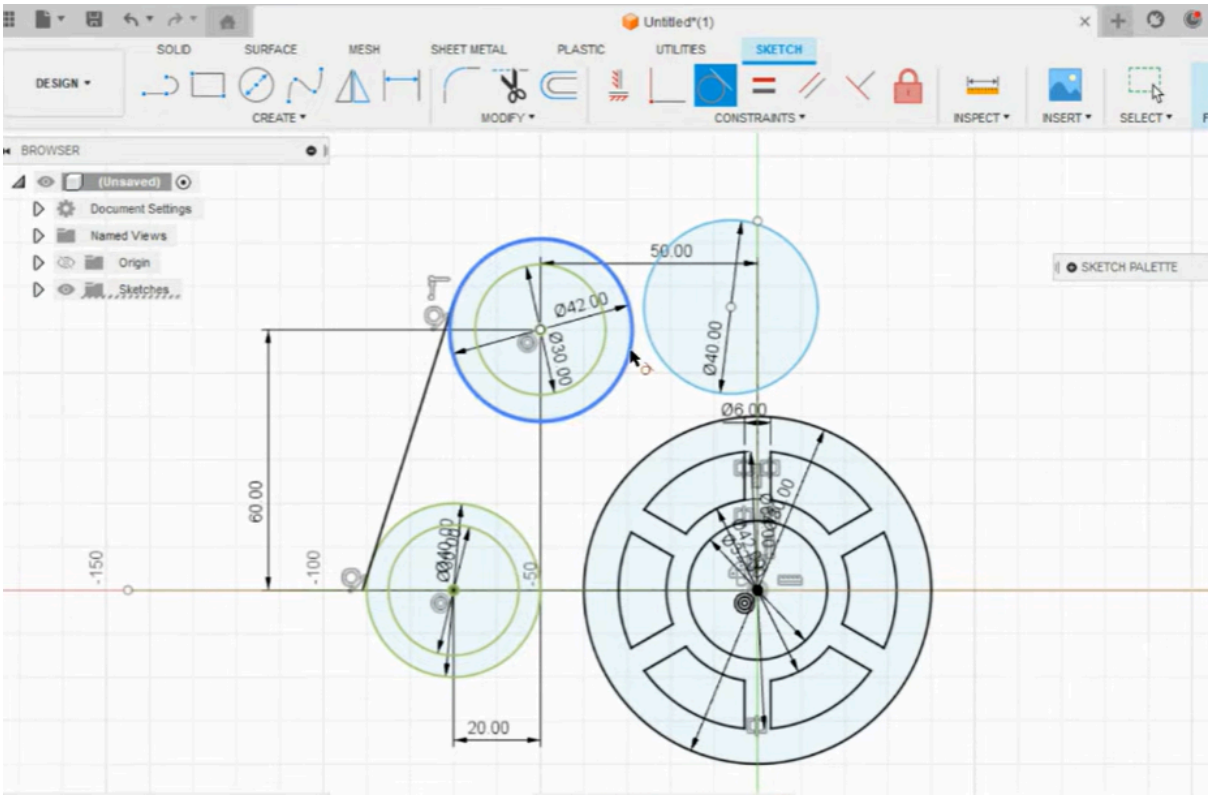

10. Connect the side circular portions with the upper and lower curved portions using the required arcs of radii 10 mm and 20 mm.

9. By using trim options we can use the trim options to cut the lines and curves as we want in our way.

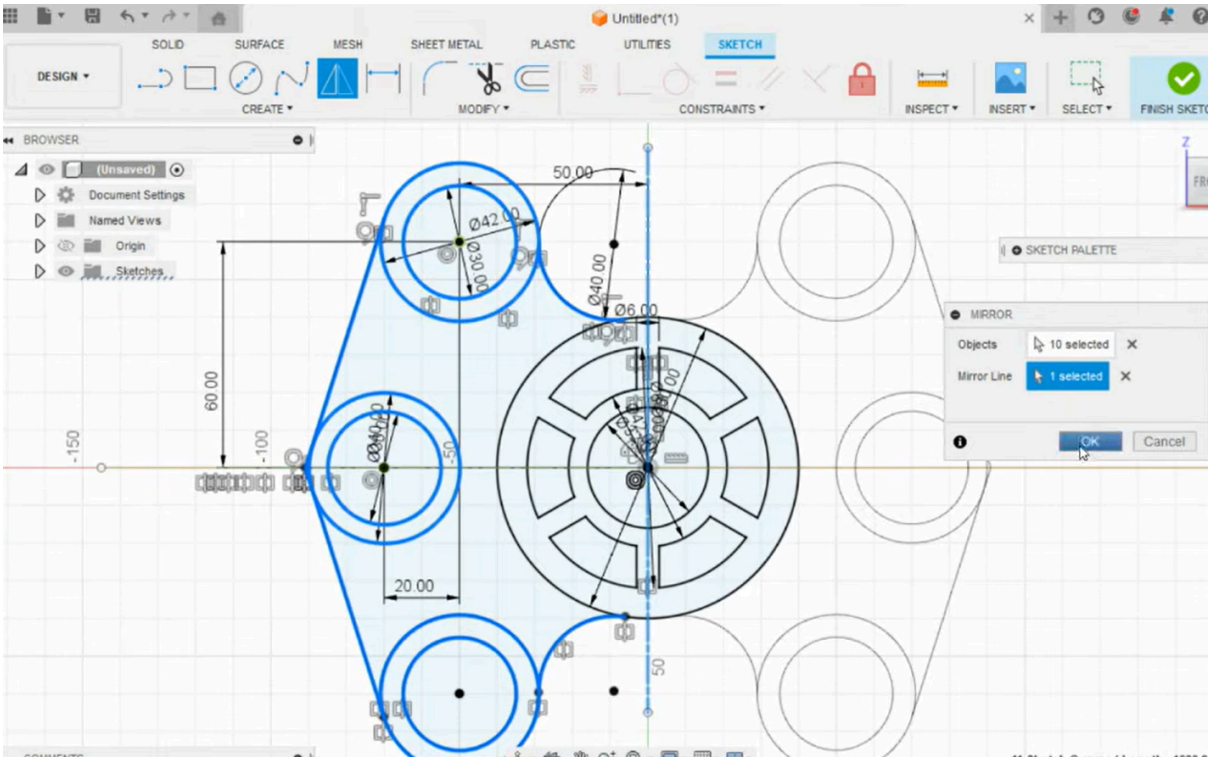

10. By using tangent option we can easily tangent the circles so we could easily attach the lines and circles like 30mm circles.

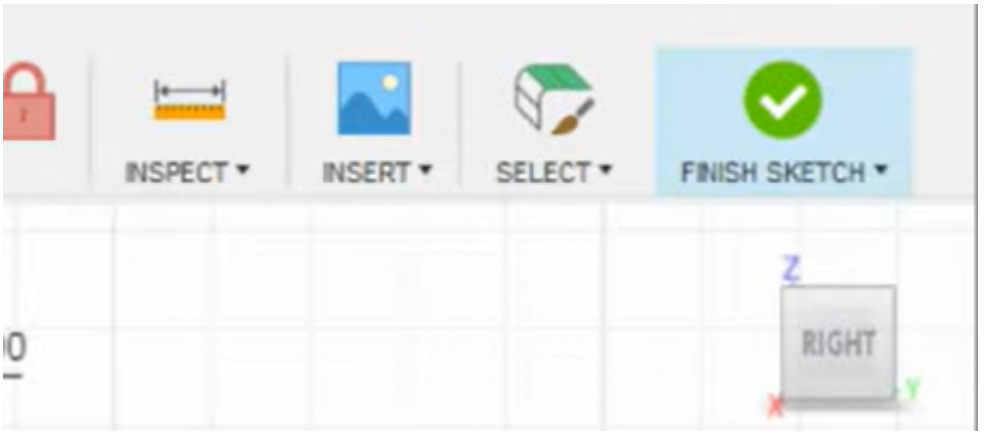

10. Select the Mirror tool and mirror the half profile using the centre line to obtain a symmetrical sketch.

11. Use the Trim tool to remove the unwanted portions of overlapping circles, arcs and lines.

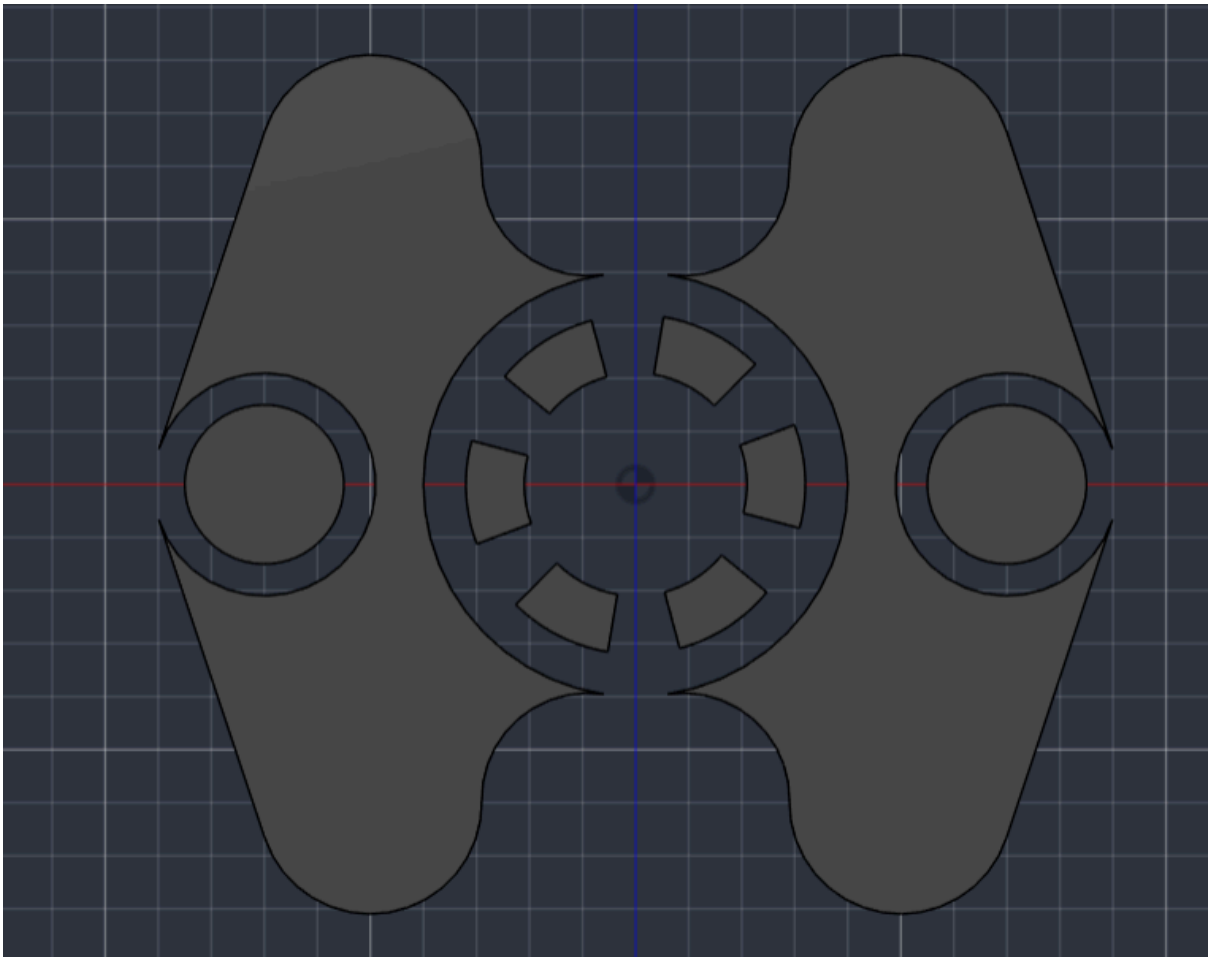

12. Draw a small circle of radius 6 mm at the centre and use the Circular Pattern tool to create six equally spaced circles.

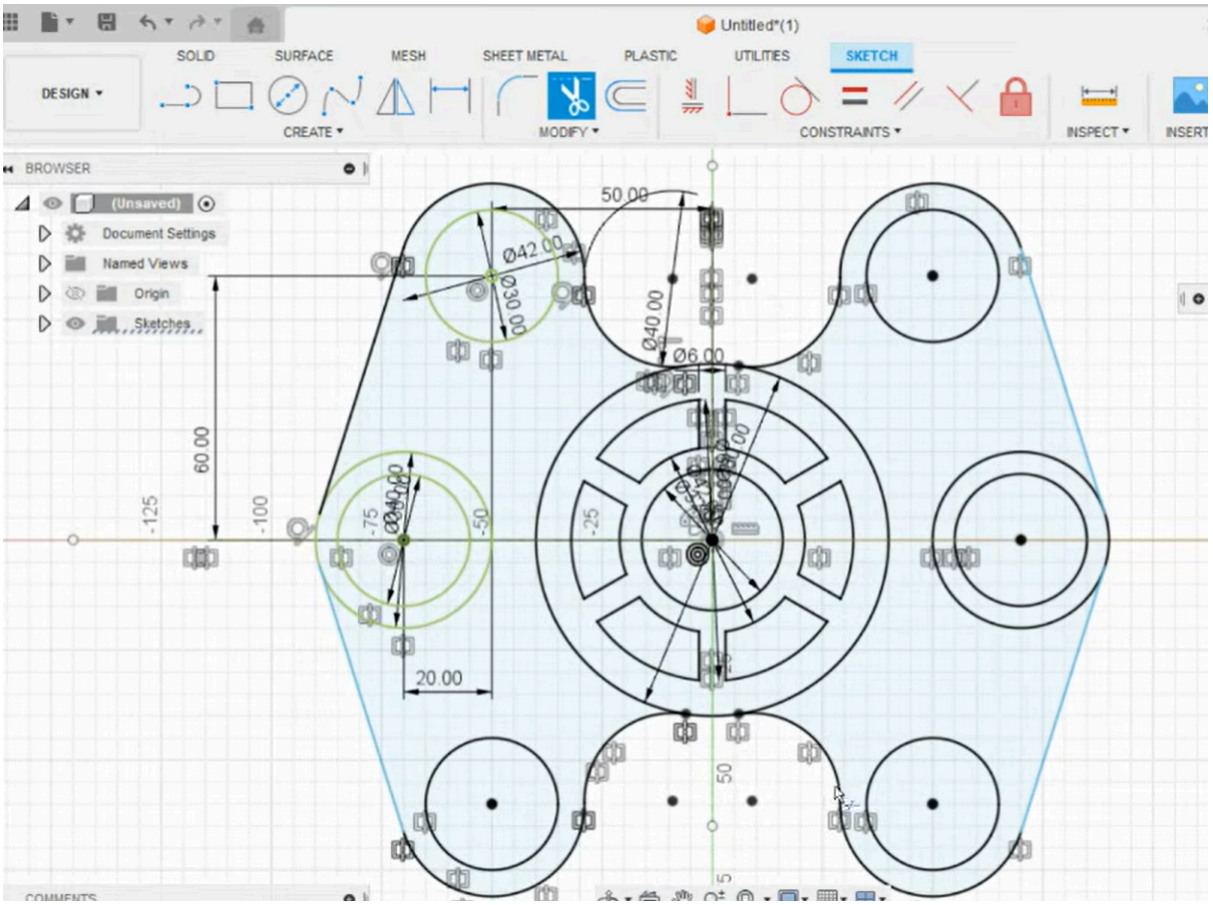

13.Finally by using the finish sketch option so we can conclude our project

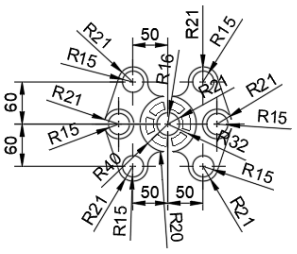

14.Finish the project by extrude it on the given mm.

SKETCHES:

OUTPUT:

Dept.	Technical reference	Created by jeevansri vikram 07-10-2026	Approved by
		Document type	Document status
		Title: EDM EX NO: 2	DWG No.
			Rev. / Date of issue / Sheet 1/1

RESULT:

Thus the given sketch is drawn and drafted using fusion 360 tool.
